

LUND
UNIVERSITY

eSSENCE

Magnus Ullner
vice-coordinator at LU

eScience – An e-Science SRA

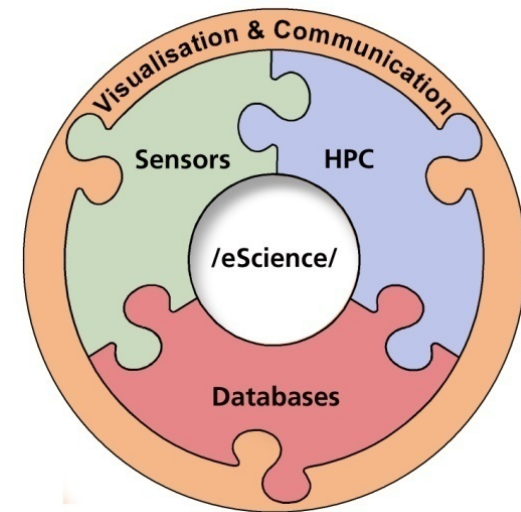

THE E-SCIENCE COLLABORATION

- 20 Strategic Research Areas (SRAs) were defined in the 2008 Government Bill on Research Policy
 - Cancer, Diabetes, Epidemiology, e-Science, Molecular biosciences, Nanoscience and nanotechnology ...
- 43 research environments (also called SRAs) were selected for financing 2010-2014 through Swedish Research Council, FAS, Formas, VINNOVA, and the Swedish Energy Agency

What is e-Science?

- A collective term for scientific endeavours making advanced use of computers, storage and networks
 - high-performance computing
 - sensor-based research
 - database-based research
- Computational tools and methods to
 - solve scientific problem
 - optimally utilise resources
 - handle distributed resources

e-Science Initiatives in Sweden

- SRA: eSSENCE (LU, UmU, UU)
www.essenceofescience.se
- SRA: SeRC (KTH, SU, KI, LiU)
www.e-science.se
- Local: Chalmers e-Science Centre
www.chalmers.se/rss/e-science-en

eSSENCE
THE E-SCIENCE COLLABORATION

eScience – Budget

THE E-SCIENCE COLLABORATION

University	2010	2011	2012	2013	2014
LU (35 %)	3 500	4 900	9 100	9 100	9 100
UmU (20 %)	2 000	2 800	5 200	5 200	5 200
UU (45 %)	4 500	6 300	11 700	11 700	11 700
Total	10 000	14 000	26 000	26 000	26 000

- 90 % for projects at the universities
- 10 % for common expenses
 - Joint activities such as workshops, conference participation, involvement in higher education, coordination, etc.
 - A post-doc programme supporting research areas and collaborations covering more than one university (2012 -

Programme Council
3 university, 1 external representatives

LU representatives
Sven Strömqvist

Management Group
Programme Coordinator
6 university representatives

Göran Sandberg
Magnus Ullner

Local Reference Groups
PI:s and other stakeholders

Focus Area Materials Science
Research groups

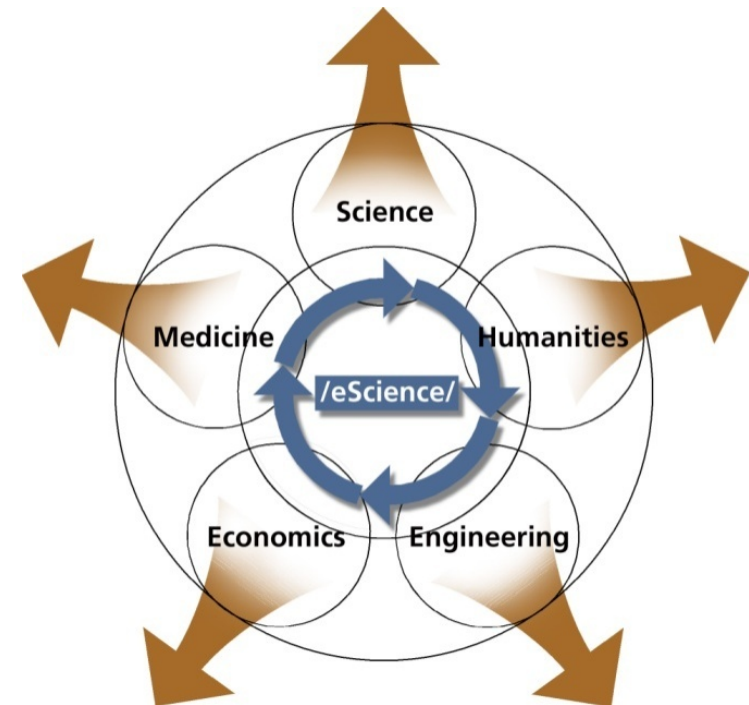

Focus Area Human Function and Environment
Research groups

Focus Area Generic e-Science Methods and Tools
Research groups

Focus Area Life Science
Research groups

Additional e-Science Initiatives
Research groups

- Research at five faculties
 - Science
 - Engineering
 - Medicine
 - Economics and Management
 - Humanities and Theology

- Collaborations between faculties and departments

- Human Function and Environment
 - Geo-demographic data (Physical Geography and Ecosystems Analysis/Economic Demography)
 - Sensor-based research in the humanities and medicine (Humanities Laboratory/Lund Bioimaging Centre)
 - Organ matching for transplantation (Cardiothoracic Surgery/Computer Science)
 - Monitoring during childbirth (Reproductive Epidemiology/Computer Science)

- **Materials Science**
 - Nanomaterials (Theoretical Chemistry, Solid State Physics)
 - Data processing for computational mechanics (Fluid Mechanics/Mathematics, Solid Mechanics/Structural Mechanics)
- **Generic e-Science Methods and Tools**
 - Grid middleware (Experimental High-Energy Physics)
 - Large scale visual and semantic processing (Mathematics/Computer Science)
- **Other e-Science Initiatives**
 - Classification tool for bird singing (Mathematical Statistics/Molecular Ecology and Evolution Lab/Biology)

eScience – e-Infrastructure

THE E-SCIENCE COLLABORATION

- SNIC – Swedish National Infrastructure for Computing
 - Lunarc, Lund
 - HPC2N, Umeå
 - UPPMAX, Uppsala
 - C3SE, Göteborg
 - NSC, Linköping
 - PDC, Stockholm
- SUNET – Swedish University Computer Network
